DETAILED ACTION

Page 2

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-11, drawn to an optical transceiver for use with an optical plug including a light emitter and/or light-transmissive substance to support the optical socket classified in class 385, subclass 88.
 - II. Claims 12-32 drawn to a method of producing an optical transceiver through distinct steps including forming a guide hole, forming wiring film and mounting a lens classified in class 385, subclass 93.
 - III. Claims 33-35 drawn to a method of producing an optical connector substrate through distinct steps including temporarily mounting a substrate, forming a portion of the hardening resin and puling out the resin, classified in class 385, subclass 53.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are related as process of making and process of using the product. The use as claimed cannot be practiced with a materially different product. Since the product is not allowable, restriction is proper between said method of making and method of using. The product claim will be examined along with the elected invention (MPEP § 806.05(i)).

Art Unit: 2883

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II and III, restriction for examination purposes as indicated is proper.

4. This application contains claims directed to the following patentably distinct species of the claimed invention:

The above Group II claims 12-29 includes the following patentably distinct species:

- A. Claims 12-13, 17-18, 20-28 and 30-32 are directed to a method of producing an optical transceiver including the steps of forming a wiring film, serving as a wiring pattern, on one surface of a light-transmissive substrate; joining an optical element having at least one of a light-emitting and a light-receiving function to a predetermined location of the wiring film; disposing a lens on the other surface of the substrate.
- B. Claims 14-16 are directed to a method of producing an optical transceiver including the steps of forming a guide hole in a predetermined location of a light-transmissive substrate; forming a wiring film, serving as a wiring pattern, on one surface of the substrate by positioning the wiring film so that the wiring film is aligned with the guide hole.
- C. Claim 19 is directed to a method of producing an optical transceiver including the step of disposing a plurality of optical elements on the one surface of the substrate in correspondence with the locations of the plurality of unit wiring patterns.
- D. Claim 29 is directed to a method of producing an optical transceiver

Page 3

Art Unit: 2883

including the step of mounting a plurality of optical sockets incorporating respective lenses to the other surface of the substrate in correspondence with respective pairs of the optical elements and the lenses.

E Claims 33-35 are directed to a method of producing an optical transceiver including the step of

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

Art Unit: 2883

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. A telephone call was made to Mr. Oliff on 11/3/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 2883

Contact Information

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to K. Cyrus Kianni whose telephone number is (571) 272-2417.

The examiner can normally be reached on Monday through Friday from 8:30 a.m. to 6:00 p.m. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Frank Font, can be reached at (571) 272-2415.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks Washington, D.C. 20231

or faxed to:

(703) 872-9306 (for formal communications intended for entry)

or:

Hand delivered responses should be brought to Crystal Plaza 4, 2021 South Clark Place, Arlington, VA., Fourth Floor (Receptionist).

Any inquiry of a general nature or relating to the status of this application should be directed to the Group Receptionist whose telephone number is (703) 308-0956.

K. Cyrus Kianni Patent Examiner
